

San Diego County DENTAL SOCIETY

MENTORSHIP PROGRAM

Mentees

You learned so much in dental school, but what about all the things they didn't teach you? How do you get the support you need in order to successfully thrive in dentistry?

The San Diego County Dental Society's Mentorship Program aims to connect our seasoned and more experienced dentists with our newer member dentists.

Our mentors provide guidance on everything from buying and growing a practice, building patient relationships, training and hiring staff and work/life balance. If you desire more focused mentoring in prosthodontics, pediatrics, orthodontics and endodontics, we can match you with a mentor who specializes in one of those fields.

With a solid network of support, you'll be better equipped to make wiser career decisions down the road.

Mentee Requirements

- Active member of SDCDS
- Graduate of dental school within the last ten years
- Commitment of at least 6-8 months
- Honor all your appointments.
- Willing and able to receive honest feedback
- Understand and communicate your goals to your mentor
- Be prepared and ready to learn each meeting
- Any concerns, please contact our office immediately
